EVO

AWD RALLY CAR

Based on the four-time World Rally Championship car, we built a unique camera platform. With over 400 hp on tap there is plenty of power to keep up with the quickest vehicles. And, with its all wheel drivetrain you can be shooting on the pavement in the morning and slinging gravel (or snow) in the afternoon. Four race-style seats provide security at speed and, like all of our specialty cars, it comes rigged with our Quick Change Post and Beam camera mounting system.
